Christian Chenault

has successfully completed the online, non-credit Specialization

Become a Professional React Developer

This React Specialization course covers everything from foundational principles to advanced concepts and practical challenges. You'll start with React basics, advance through complex topics, and apply your knowledge in real-world projects, such as building apps and games. Additionally, the course prepares you for technical interviews with curated questions that enhance your problem-solving skills.

Bob Ziroll
Head of Education at Scrimba

Per Harald Borgen
